Northwind Manufacturing — Vendor Master Change Policy

Policy ID: FIN-MDG-021 | Version 2.0 | Owner: Daniel Park, MDG Steward | Effective 2026-03-01

1. Purpose

This policy governs how vendor master records are created and changed in SAP S/4HANA, SAP ECC and NetSuite. It protects Northwind against payment fraud and duplicate vendors.

2. Who may request a change

Only buyers and category managers may request a vendor master change, through the MDG workflow in SAP. Requests by email or IT ticket are no longer accepted after 2026-03-01.

3. Approval

The MDG steward approves or rejects every change within **2 business days** of the request. Changes to bank details also need approval by the AP manager.

4. Bank detail changes

Bank detail changes require **two independent call-backs by different people** to the vendor, using the phone number already on file (never the number given in the change request). The call-back is recorded in the MDG workflow.

No bank detail change may take effect in the **3 business days** before a scheduled payment run.

5. Duplicate checks

Before a vendor is created, MDG checks the tax ID, bank account and address against existing records. A match above 85% similarity blocks the request until the MDG steward reviews it.

6. Service levels

Request type	Target	Escalation
New vendor	5 business days	Procurement director
Address change	2 business days	MDG steward
Bank detail change	2 business days	AP manager

7. Monitoring

Internal Audit reviews a sample of 30 bank detail changes every quarter.
